

SATENDRA

Angular Developer (3.5+ YOE) | Full Stack (Angular + Java)

Email: -satendracoder@gmail.com | Mobile: - +91 8859758708 | GitHub:- github.com/satendracoder

LinkedIn: [linkedin.com/in/satendracoder](https://www.linkedin.com/in/satendracoder) | Portfolio:- www.satendracoder.com

PROFESSIONAL SUMMARY

Full Stack developer with 3.5+ years of experience in building responsive, secure, and scalable web applications using Angular (v14–18), TypeScript, RxJS, and Signals. Strong expertise in UI/UX optimization, REST API integration, and JWT-based authentication. Experienced in developing fintech solutions including AEPS, Recharge, Micro-ATM, Bill Payments, and HDFC Loan modules using reusable and scalable component architecture.

Proficient with modern development tools and workflows including Git, GitHub, CI/CD pipelines, PWA development, Device SDK integrations, and Postman for API testing. Additionally, I have 1.5+ years of hands-on experience in Java Spring Boot for developing and maintaining secure REST APIs and backend services. Immediate Joiner.

TECHNICAL SKILLS

Front-end: Angular 14-18, RxJS, HTML5, CSS3, SCSS, JavaScript, Typescript, Angular Material, Bootstrap, Tailwind

Back-end: Java, Spring Boot, REST APIs, JWT Authentication

Databases: MySQL

Tools: Git, GitHub, GitHub Actions, Postman, IntelliJ IDEA, Jira

Other: PWA, TWA, Device SDK Integration (Mantra, Morpho, Micro-ATM)

Architecture & Concepts: Reactive forms, lazy loading, module splitting, interceptors, Role-Based Access Control (RBAC), Reusable Components, Aadhaar Authentication, Cross-browser compatibility

PROFESSIONAL EXPERIENCE

Full Stack Developer (Angular + Java) | Vastika Technologies

Dec 2024 – Mar 2026 (Contract)

- Built configurable multi-step loan journeys for ADCB Loan Origination System using Angular, improving loan onboarding workflow efficiency by 30%.
- Implemented dynamic UI rendering using backend-driven flags (ROI, processing fee, security, stock statement, limits).
- Worked on document upload, customer data capture, eligibility checks, and application tracking modules.
- Developed dealer-focused loan application flows and dashboards for Axis Bank LOS.

Full Stack Developer (Angular + Java) | Redmil Business Mall

Sep 2024 – Nov 2025

- Enhanced and maintained **full-stack web applications** using **Java Spring Boot** and **Angular 18**.
- Built fintech modules including AEPS, Micro-ATM, Recharge, Bill Payment, and Cash-Out with end-to-end API integration.
- Implemented secure role-based access control (Admin, Agent, Retailer) using JWT.
- Integrated Mantra, Morpho biometric, and Micro-ATM devices using **Angular SDKs** for Aadhaar-based authentication — achieved 90% success rate and reduced transaction errors by 40%
- Collaborated with backend teams for API optimization, error handling, and secure integration.
- Created Java Spring Boot backend services for data extraction and export via REST APIs, improving processing efficiency and scalability.

Angular Developer | Redmil Business Mall

Apr 2022 – Apr 2024

- Expanded and optimized Angular applications for financial services.
- Improved UI/UX and resolved API synchronization issues in HDFC Loan CRM, reducing lead processing time.
- Optimized reusable Angular components for real-time financial dashboards, reducing development time for new modules by 40%.
- Reduced UI latency by 35% using zone-less patterns and manual change detection.

EDUCATION

Bachelor of Computer Applications (BCA)

Avviare Educational Hub, Noida (2019 – 2021)

CERTIFICATIONS

- Master Java (Spring Boot, Spring Security, Docker, Microservices) 2025
- Web Designing with MySQL course

PROJECTS

Satendra Coder Developer Suite (Open Source)

- A full-stack platform built under the personal brand "Satendra Coder" featuring developer resources, blogging, and learning modules.
- **Tech:** - Angular, Spring Boot, JWT, MySQL, Docker

Vastika Technologies (ADCB LOS)

- Built configurable multi-step loan journeys in Angular integrated with Java Spring Boot APIs for end-to-end loan onboarding.
- **Tech:** - Angular, Angular Material, Jira, Git, GitHub, Scrum

Vastika Technologies (Axis Bank LOS (Dealer Journey))

- Developed dealer-focused loan origination flows, dashboards, and application tracking modules in Angular with backend integration.
- **Tech:** - Angular, Angular Material, Jira, Spring Boot, MySQL

Redmil Fin-tech Platform (Banking & Payments)

- Developed a full-featured fintech web application supporting AEPS, Recharge, Bill Payments, Wallet Transactions, and Micro-ATM services. Implemented secure login, authentication & authorization, transaction dashboards, and API integration for payments. Designed UI/UX and consumed APIs for multiple financial services modules independently.
- **Tech:** - Angular, Angular Material, REST APIs, JWT, RxJS

Redmil Website PPF (Paint Protection Film)

- Developed a dynamic Angular website for paint protection film services including car listings, product management, blogs, and admin dashboard.
- **Tech:** - Angular, Angular Material, REST APIs, JWT, RxJS, GitHub, Postman

OPEN-SOURCE CONTRIBUTIONS

SC-Angular-Generator (VS Code Extension)

- Automates Angular boilerplate generation

SC Angular Loader & Toastify

- Lightweight loader library & toast notification library for Angular standalone components.
